## Overview

In 2013, over 8,400 beekeepers across Canada kept one or more honeybee colonies, for a total of more than 672,094 colonies. While the 2013 colony population was 2.7% lower than the record high in 2012 (690,037 colonies) it represents a 9% increase in total colonies compared to the average of the previous five years. The majority of these bee colonies are in the Prairies, where long summer days are ideal for foraging; Alberta, Saskatchewan and Manitoba collectively accounted for 84% of the country's total honey production. In total, Canadian honeybee colonies yielded more than 75 million pounds of honey in 2013, down 16% from 2012. Despite this decline in volume, due to higher prices, the total value of honey produced in Canada totaled just over \$176 million in 2013, down only 1% from 2012.

Looking at the trend over the last five years, the number of beekeepers remains on the rise. From 2009 to 2013, there has been a steady increase in the number of beekeepers, with 2013 demonstrating a 2% increase from 2012. Nova Scotia saw the largest increase in the number of beekeepers in 2013, up 16%. Ontario continues to have the largest number of beekeepers, with 3,150 of the 8,483 operating in Canada. British Columbia and Alberta have the second and third largest number of beekeepers with 2,323 and 900 beekeepers respectively. New bee colonies are created each season due to investment by beekeepers in maintaining and growing their operations. New Brunswick saw the greatest decrease in colonies, down 24% from 2012. Manitoba and Saskatchewan also experienced a decrease in total colonies, down 9% and 7% respectively. On the other hand, Prince Edward Island demonstrated a 19% increase in total colonies, a total of 4,432 colonies. Even though Quebec had the largest number of beekeepers, Alberta remains the province with the largest number of colonies, at 280,000 in 2013.

Nova Scotia recorded the largest increase in honey production in 2013, with total yields being 23% greater than 2012, at 2,069 million pounds. British Columbia and New Brunswick had the second and third largest increase in honey production, up 13% and 4% respectively. All other provinces had a decrease in total production, with Ontario having the largest decrease, down 32% from 2012. Consistent with being the province with the largest number of colonies, Alberta remains the largest producer of honey in 2013, producing 32 million pounds, valued at \$70 million.

Canada is a net exporter of honey. In 2013, total exports of Canadian honey were just over \$59 million, down 19% from 2012. The United States is the largest export destination for Canadian honey, accounting for 77% of all honey exports. Japan and China are the second and third largest export destinations respectively.

Canada's total honey imports totalled \$26 million in 2013. Canada imported 5,494 tonnes of honey, valued at just over \$8.6 million, from Argentina, the most from any country in 2013. Brazil and New Zealand were the second and third largest sources of honey imports; Canada imported \$3.8 million and \$3.7 million worth of honey from those two countries, respectively.

# 1. Production

## 1.1. Number of Beekeepers<sup>1</sup> by Province

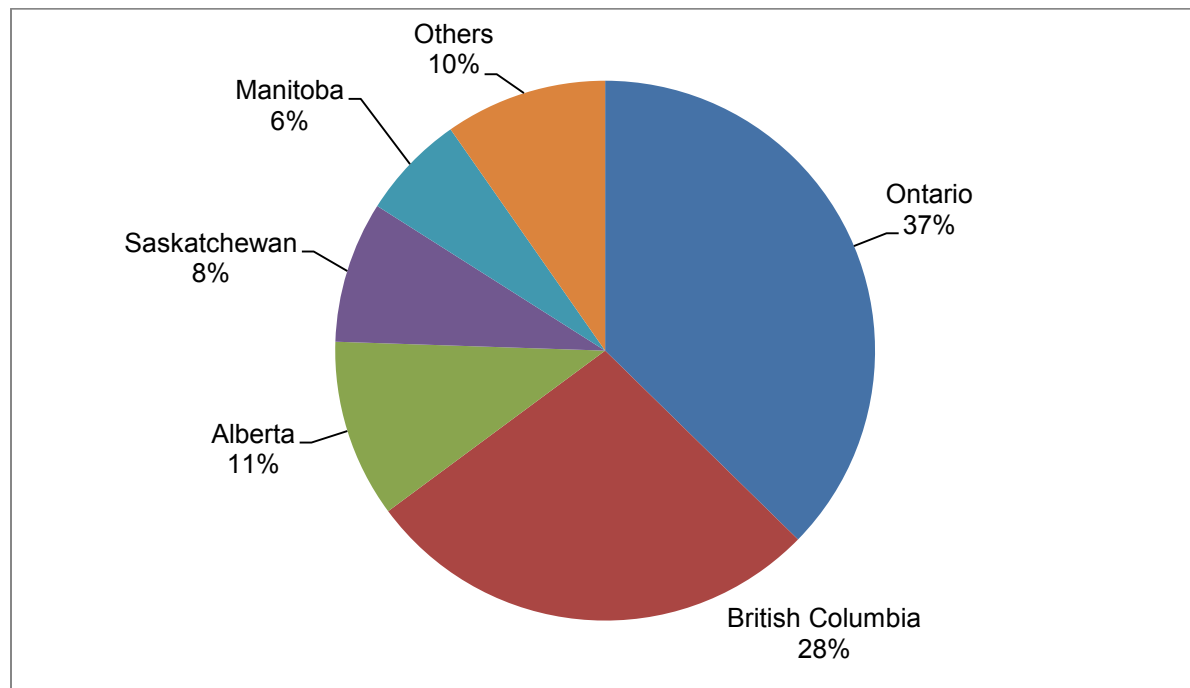

Province	2009	2010	2011	2012	2013
	Number of Beekeepers				
Prince Edward Island	28	33	43	46	45
Nova Scotia	205	215	209	230	265
New Brunswick	180	204	209	244	244
Quebec	245	262	268	305	310
Ontario	2,500	2,600	2,900	3,200	3,150
Manitoba	474	490	501	517	531
Saskatchewan	971	965	850	748	715
Alberta	683	769	798	883	900
British Columbia	1,742	1,865	1,935	2,139	2,323
<b>Canada<sup>2</sup></b>	<b>7,028</b>	<b>7,403</b>	<b>7,713</b>	<b>8,312</b>	<b>8,483</b>

Source: Statistics Canada (CANSIM Table 001-0007)

Notes:

1. Beekeeper numbers may include pollinators that may not extract honey.
2. Newfoundland and Labrador is excluded since the province has no honey production to report.
