Fallen tree reveals bustling bee hive in Wortley Village

Up to 70,000 honey bees were believed to be part of a colony found inside the tree

Travis Dolynny - CBC News - Posted: Sep 12, 2018 3:31 PM ET | Last Updated: September 12

Whats Heff's Hives today....

- Speaking / Education
 - TVDSB-Since September 2017: 3,500 kids have heard the bee's story and their relevance in a Net-Zero community.....even the cat cannot resist chillin' with the bees.

Experience. The Difference.™

Beekeeper support....To a gloomier side....AFB

- This summer asked to assist with local hives....A number of individual beekeepers had expressed concern w hive health....
- Upon inspection quickly determined the hives were AFB positive.
- All appropriate parties were notified.
- Current total of euthanized hives in London area in 2018....~100
- Sealed, gassed and treated at local landfill as hazardous waste
- Sequestered, tipped and backfilled immediately.

AFB..Looks snotty, smells funny & isn't a myth

I treat for AFB....

- Until I have better tools to fight potential infections such as AFB I will use the tools available to me.
- Once a hive has been identified as AFB positive-it must be destroyed.
- Heffs will can on your behalf and interface with municipal landfill or EfW plant to help manage an AFB outbreak.
